Subject Index of Volume 79

Acetylenes
kinetic investigation of the collisional quenching of electronically excited germanium atoms, Ge($4p^2(^1D_2)$), with acetylenes studied by time-resolved atomic resonance absorption spectroscopy in the ultra-violet, 1
Adsorption
photochemistry of semiconductor particles II. Adsorption of ions on ZnS colloid and quenching of fluorescence, 197
Aminopolycarboxylic Acid Ligands
a luminescence study of Eu(III) and Tb(III) complexes with aminopolycarboxylic acid ligands, 25
Anthracene
photoionization of naphthalene, *trans*-stilbene and anthracene adsorbed on the external and internal surfaces of zeolites, 103
Aquation
photoaquation and aquation of *trans*-dichlorobis-(bipyridine)ruthenium(III), 163
Aqueous pulp sludge
application of excimer incoherent-UV sources as a new tool in photochemistry; photodegradation of chlorinated dibenzodioxins in solution and adsorbed on aqueous pulp sludge, 141
Azo compounds
photovoltaic properties of azo compounds containing the thiazole group, 81

Bleaching
a kinetic study of the bleaching of rhodamine 6G photosensitized by titanium dioxide, 131

Cationic micelles
protonation of the triplet state of safranine in the presence of cationic micelles and polyelectrolytes, 115
Cationic surfactant
photoprocesses of eosine and rose bengal ion pairs with cationic surfactant in non-polar solvents: application in photosensitization studies, 121
Chemically induced dynamic nuclear polarization
chemically induced dynamic nuclear polarization and fluorescence spectroscopy studies of the C–O bond cleavage of α- and β-1,1-dimethylallyl-naphthylether, 153
Chemiluminescence
an electrochemically triggered chemiluminescence from polyhydric alcohols, 71
Chlorinated dibenzodioxins
application of excimer incoherent-UV sources as a new tool in photochemistry; photodegradation of chlorinated dibenzodioxins in solution and adsorbed on aqueous pulp sludge, 141
Chlorophyll a
effect of oxy-free radicals upon the phytyl chain during chlorophyll a photodegradation, 167
Cholesteryl oleyl carbonate
influence of liquid crystalline solvents — cholesteryl oleyl carbonate and 4-*n*-octyl-4′-cyanobiphenyl — on fluorescence of exciplex of perylene and *N*,*N*-dimethylaniline, 95

α-Cleavage
wavelength effects in the photolysis of ketones: intramolecular hydrogen abstraction of *o*-methyl-dibenzyl ketones *vs.* α-cleavage in micellar solution, 173
Cobalt cyanide
photocatalytic redox processes in aqueous ethanol solutions of mixed cobalt cyanide complexes, 33
C–O bond
chemically induced dynamic nuclear polarization and fluorescence spectroscopy studies of the C–O bond cleavage of α- and β-1,1-dimethylallyl-naphthylether, 153
Collisional quenching
kinetic investigation of the collisional quenching of electronically excited germanium atoms, Ge($4p^2(^1D_2)$), with acetylenes studied by time-resolved atomic resonance absorption spectroscopy in the ultra-violet, 1
Conformational equilibria
photophysical properties and conformational equilibria of *trans*-1-(*n*-pyridyl)-2-(2-quinoxalinyl)ethenes, 39
Cupric ions
products and nucleation analysis of photoelectrochemical reduction of cupric ions in the $CuSO_4$–methanol–TiO_2 suspension system, 203
$CuSO_4$–methanol–TiO_2
products and nucleation analysis of photoelectrochemical reduction of cupric ions in the $CuSO_4$–methanol–TiO_2 suspension system, 203
β-Cyclodextrin
a study of the inclusion complexes of β-cyclodextrin with three electronic states of 4-(*N*,*N*-dimethylamino)benzonitrile, 181

Degradation
heterogeneous photocatalysis: degradation of ethylbenzene in TiO_2 aqueous suspensions, 213
trans-Dichlorobis(pyridine)ruthenium(III)
photoaquation and aquation of *trans*-dichlorobis-(bipyridine)ruthenium(III), 163
4-(*N*,*N*-Dimethylamino)benzonitrile
a study of the inclusion complexes of β-cyclodextrin with three electronic states of 4-(*N*,*N*-dimethylamino)-benzonitrile, 181
N,*N*-Dimethylaniline
influence of liquid crystalline solvents — cholesteryl oleyl carbonate and 4-*n*-octyl-4′-cyanobiphenyl — on fluorescence of exciplex of perylene and *N*,*N*-dimethylaniline, 95

Electrogenerated chemiluminescence
an electrochemically triggered chemiluminescence from polyhydric alcohols, 71
Electrolytic oxidation
an electrochemically triggered chemiluminescence from polyhydric alcohols, 71
Electron transfer
regiochemistry on photoamination of methoxy-substituted phenanthrenes via electron transfer, 61

Eosine
photoprocesses of eosine and rose bengal ion pairs with cationic surfactant in non-polar solvents: application in photosensitization studies, 121
Ethylbenzene
heterogeneous photocatalysis: degradation of ethylbenzene in TiO_2 aqueous suspensions, 213
Excimer incoherent-UV sources
application of excimer incoherent-UV sources as a new tool in photochemistry; photodegradation of chlorinated dibenzodioxins in solution and adsorbed on aqueous pulp sludge, 141
Exciplex
influence of liquid crystalline solvents — cholesteryl oleyl carbonate and 4-*n*-octyl-4′-cyanobiphenyl — on fluorescence of exciplex of perylene and *N*,*N*-dimethylaniline, 95
Excitation-wavelength
proton transfer and excitation-wavelength-dependent fluorescence and phosphorescence spectra of 4-methyl-2,6-diformyl phenol: interaction with triethylamine, 49
Excited state carbocations
adiabatically photogenerated thioxanthenium cations: probes of reactivity of nucleophiles towards excited state carbocations in aqueous solution, 55

Fluorescence
proton transfer and excitation-wavelength-dependent fluorescence and phosphorescence spectra of 4-methyl-2,6-diformyl phenol: interaction with triethylamine, 49
influence of liquid crystalline solvents — cholesteryl oleyl carbonate and 4-*n*-octyl-4′-cyanobiphenyl — on fluorescence of exciplex of perylene and *N*,*N*-dimethylaniline, 95
photochemistry of semiconductor particles. II. Adsorption of ions on ZnS colloid and quenching of fluorescence, 197
Fluorescence spectroscopy
chemically induced dynamic nuclear polarization and fluorescence spectroscopy studies of the C–O bond cleavage of α- and β-1,1-dimethylallyl-naphthylether, 153

Germanium
kinetic investigation of the collisional quenching of electronically excited germanium atoms, $Ge(4p^2(^1D_2))$, with acetylenes studied by time-resolved atomic resonance absorption spectroscopy in the ultra-violet, 1

Hydrogen abstraction
a laser flash photolysis study of magnetic field effects on the hydrogen abstraction reaction of xanthone from xanthene in micellar solution, 89
wavelength effects in the photolysis of ketones: intramolecular hydrogen abstraction of *o*-methyl-dibenzyl ketones *vs.* α-cleavage in micellar solution, 173

Iridium peroxo complexes
photochemical elimination of singlet oxygen from iridium peroxo complexes, 19
Irradiation
photochemical reactions of nitroarenes with styrene, 67

Ketones
wavelength effects in the photolysis of ketones: intramolecular hydrogen abstraction of *o*-methyl-dibenzyl ketones *vs.* α-cleavage in micellar solution, 173

Laser flash photolysis
a laser flash photolysis study of magnetic field effects on the hydrogen abstraction reaction of xanthone from xanthene in micellar solution, 89
Luminescence
a luminescence study of Eu(III) and Tb(III) complexes with aminopolycarboxylic acid ligands, 25

Magnetic field effects
a laser flash photolysis study of magnetic field effects on the hydrogen abstraction reaction of xanthone from xanthene in micellar solution, 89
o-Methyl-dibenzyl ketones
wavelength effects in the photolysis of ketones: intramolecular hydrogen abstraction of *o*-methyl-dibenzyl ketones *vs.* α-cleavage in micellar solution, 173
4-Methyl-2,6-diformyl phenol
proton transfer and excitation-wavelength-dependent fluorescence and phosphorescence spectra of 4-methyl-2,6-diformyl phenol: interaction with triethylamine, 49
Micellar environment
effects of solvent and micellar environment on the spectroscopic behaviour of the dye safranine T, 109

Naphthalene
photoionization of naphthalene, *trans*-stilbene and anthracene adsorbed on the external and internal surfaces of zeolites, 103
Nitroarenes
photochemical reactions of nitroarenes with styrene, 67
Nucleation
products and nucleation analysis of photoelectrochemical reduction of cupric ions in the $CuSO_4$–methanol–TiO_2 suspension system, 203
Nucleophiles
adiabatically photogenerated thioxanthenium cations: probes of reactivity of nucleophiles towards excited state carbocations in aqueous solution, 55

4-*n*-Octyl-4′-cyanobiphenyl
influence of liquid crystalline solvents — cholesteryl oleyl carbonate and 4-*n*-octyl-4′-cyanobiphenyl — on fluorescence of exciplex of perylene and *N*,*N*-dimethylaniline, 95
Oxy-free radicals
effect of oxy-free radicals upon the phytyl chain during chlorophyll a photodegradation, 167

Perylene
influence of liquid crystalline solvents — cholesteryl oleyl carbonate and 4-*n*-octyl-4′-cyanobiphenyl — on fluorescence of exciplex of perylene and *N*,*N*-dimethylaniline, 95
Phenalenone
phenalenone, a universal reference compound for the determination of quantum yields of singlet oxygen $O_2(^1\Delta_g)$ sensitization, 11
Phenanthrenes
regiochemistry on photoamination of methoxy-substituted phenanthrenes via electron transfer, 61
Phosphorescence spectra
proton transfer and excitation-wavelength-dependent fluorescence and phosphorescence spectra of 4-methyl-2,6-diformyl phenol: interaction with triethylamine, 49

Photoamination
regiochemistry on photoamination of methoxy-substituted phenanthrenes via electron transfer, 61
Photoaquation
photoaquation and aquation of *trans*-dichlorobis(bipyridine)ruthenium(III), 163
Photocatalysis
photocatalytic redox processes in aqueous ethanol solutions of mixed cobalt cyanide complexes, 33
heterogeneous photocatalysis: degradation of ethylbenzene in TiO_2 aqueous suspensions, 213
Photochemical elimination
photochemical elimination of singlet oxygen from iridium peroxo complexes, 19
Photodegradation
application of excimer incoherent-UV sources as a new tool in photochemistry; photodegradation of chlorinated dibenzodioxins in solution and adsorbed on aqueous pulp sludge, 141
effect of oxy-free radicals upon the phytyl chain during chlorophyll a photodegradation, 167
Photoelectrochemical reduction
products and nucleation analysis of photoelectrochemical reduction of cupric ions in the $CuSO_4$–methanol–TiO_2 suspension system, 203
Photoinduced chemical reactions
substrate-mediated mechanism for photoinduced chemical reactions on metal surfaces, 221
Photoionization
photoionization of naphthalene, *trans*-stilbene and anthracene adsorbed on the external and internal surfaces of zeolites, 103
Photolysis
wavelength effects in the photolysis of ketones: intramolecular hydrogen abstraction of *o*-methyl-dibenzyl ketones *vs.* α-cleavage in micellar solution, 173
Photosensitization
photoprocesses of eosine and rose bengal ion pairs with cationic surfactant in non-polar solvents: application in photosensitization studies, 121
Photosensitized
a kinetic study of the bleaching of rhodamine 6G photosensitized by titanium dioxide, 131
Photovoltaic properties
photovoltaic properties of azo compounds containing the thiazole group, 81
Phytyl chain
effect of oxy-free radicals upon the phytyl chain during chlorophyll a photodegradation, 167
Polyelectrolytes
protonation of the triplet state of safranine in the presence of cationic micelles and polyelectrolytes, 115
Polyhydric alcohols
an electrochemically triggered chemiluminescence from polyhydric alcohols, 71
Protonation
protonation of the triplet state of safranine in the presence of cationic micelles and polyelectrolytes, 115
Proton transfer
proton transfer and excitation-wavelength-dependent fluorescence and phosphorescence spectra of 4-methyl-2,6-diformyl phenol: interaction with triethylamine, 49
trans-1-(*n*-Pyridyl)-2-(2-quinoxalinyl)ethenes
photophysical properties and conformational equilibria of *trans*-1-(*n*-pyridyl)-2-(2-quinoxalinyl)ethenes, 39
Quantum yields
phenalenone, a universal reference compound for the determination of quantum yields of singlet oxygen $O_2(^1\Delta_g)$ sensitization, 11
Quenching
photochemistry of semiconductor particles. II. Adsorption of ions on ZnS colloid and quenching of fluorescence, 197

Redox reactions
photocatalytic redox processes in aqueous ethanol solutions of mixed cobalt cyanide complexes, 33
Rhodamine 6G
a kinetic study of the bleaching of rhodamine 6G photosensitized by titanium dioxide, 131
Rose bengal
photoprocesses of eosine and rose bengal ion pairs with cationic surfactant in non-polar solvents: application in photosensitization studies, 121

Safranine
protonation of the triplet state of safranine in the presence of cationic micelles and polyelectrolytes, 115
Safranine T
effects of solvent and micellar environment on the spectroscopic behaviour of the dye safranine T, 109
Semiconductor particles
photochemistry of semiconductor particles. I. Optical properties of ZnS sols, 189
photochemistry of semiconductor particles. II. Adsorption of ions on ZnS colloid and quenching of fluorescence, 197
Singlet oxygen
photochemical elimination of singlet oxygen from iridium peroxo complexes, 19
Singlet oxygen sensitization
phenalenone, a universal reference compound for the determination of quantum yields of singlet oxygen $O_2(^1\Delta_g)$ sensitization, 11
Solvent environment
effects of solvent and micellar environment on the spectroscopic behaviour of the dye safranine T, 109
trans-Stilbene
photoionization of naphthalene, *trans*-stilbene and anthracene adsorbed on the external and internal surfaces of zeolites, 103
Styrene
photochemical reactions of nitroarenes with styrene, 67

Thiazole group
photovoltaic properties of azo compounds containing the thiazole group, 81
Thioxanthenium cations
adiabatically photogenerated thioxanthenium cations: probes of reactivity of nucleophiles towards excited state carbocations in aqueous solution, 55
TiO_2
heterogeneous photocatalysis: degradation of ethylbenzene in TiO_2 aqueous suspensions, 213
Titanium dioxide
a kinetic study of the bleaching of rhodamine 6G photosensitized by titanium dioxide, 131
Triethylamine
proton transfer and excitation-wavelength-dependent fluorescence and phosphorescence spectra of 4-methyl-2,6-diformyl phenol: interaction with triethylamine, 49

Triplet state
protonation of the triplet state of safranine in the presence of cationic micelles and polyelectrolytes, 115

Wavelength
wavelength effects in the photolysis of ketones: intramolecular hydrogen abstraction of *o*-methyl-dibenzyl ketones *vs.* α-cleavage in micellar solution, 173

Xanthene
a laser flash photolysis study of magnetic field effects on the hydrogen abstraction reaction of xanthone from xanthene in micellar solution, 89

Xanthone
a laser flash photolysis study of magnetic field effects on the hydrogen abstraction reaction of xanthone from xanthene in micellar solution, 89

Zeolites
photoionization of naphthalene, *trans*-stilbene and anthracene adsorbed on the external and internal surfaces of zeolites, 103

ZnS colloid
photochemistry of semiconductor particles. II. Adsorption of ions on ZnS colloid and quenching of fluorescence, 197

ZnS sols
photochemistry of semiconductor particles. I. Optical properties of ZnS sols, 189
